

cli_client.ApiClient.delete

cli_client.ApiClient.get

cli_client.ApiClient.head

cli_client.ApiClient.prepare_query

```
graph LR; A[cli_client.ApiClient.delete] --> D[cli_client.ApiClient.prepare_query]; B[cli_client.ApiClient.get] --> D; C[cli_client.ApiClient.head] --> D;
```

The diagram illustrates a mapping from three distinct API methods to a single, shared method. On the left, three white rectangular boxes are stacked vertically, each containing a method name: 'cli_client.ApiClient.delete' at the top, 'cli_client.ApiClient.get' in the middle, and 'cli_client.ApiClient.head' at the bottom. On the right, a single gray rectangular box contains the method name 'cli_client.ApiClient.prepare_query'. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that the 'delete', 'get', and 'head' methods all utilize or are implemented by the 'prepare_query' method.
