

show\_config\_tam.get  
\_tam\_config\_cmds

```
graph LR; A[show_config_tam.get_tam_config_cmds] --> B[show_config_tam.getAclRuleHash]; A --> C[show_config_tam.getProtocol];
```

The diagram illustrates a hierarchical structure. A single parent node on the left, labeled 'show\_config\_tam.get\_tam\_config\_cmds', has two outgoing arrows pointing to two separate child nodes on the right. The top child node is labeled 'show\_config\_tam.getAclRuleHash' and the bottom child node is labeled 'show\_config\_tam.getProtocol'. All nodes are rectangular boxes with black outlines.
