

RuntimeError

```
classDiagram
    class RuntimeError
    class sonic_cli_fbs_FbsAcIError["sonic_cli_fbs.FbsAcIError"]
    sonic_cli_fbs_FbsAcIError --|> RuntimeError
```

The diagram illustrates a class hierarchy. At the top is the 'RuntimeError' class, represented by a rectangle with three horizontal compartments. The top compartment contains the text 'RuntimeError', while the other two are empty. Below it is the 'sonic\_cli\_fbs.FbsAcIError' class, represented by a rectangle with three horizontal compartments. The top compartment contains the text 'sonic\_cli\_fbs.FbsAcIError', and the other two are shaded gray. A blue arrow with an open triangular head points from the top compartment of the 'sonic\_cli\_fbs.FbsAcIError' class to the bottom compartment of the 'RuntimeError' class, indicating that 'sonic\_cli\_fbs.FbsAcIError' inherits from 'RuntimeError'.

sonic\_cli\_fbs.FbsAcIError
