```
graph LR; A["show_config_static_routes.show_ntwk_static_v4route"] --> C["show_config_static_routes.static_route_ntwk_inst"]; B["show_config_static_routes.show_ntwk_static_v6route"] --> C;
```

The diagram illustrates a mapping from two specific static route configurations to a more general static route configuration. On the left, there are two white rectangular boxes. The top box contains the text 'show\_config\_static\_routes.show\_ntwk\_static\_v4route' and the bottom box contains 'show\_config\_static\_routes.show\_ntwk\_static\_v6route'. On the right, there is a gray rectangular box containing the text 'show\_config\_static\_routes.static\_route\_ntwk\_inst'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both specific configurations are mapped to or derived from the general configuration.
