

RuntimeError

```
classDiagram
    class RuntimeError
    class sonic_cli_acl_SonicAclCLIError["sonic_cli_acl.SonicAclCLIError"]
    sonic_cli_acl_SonicAclCLIError --|> RuntimeError
```

The diagram illustrates a class hierarchy. At the top is a class box for 'RuntimeError', which is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. Below it is a class box for 'sonic_cli_acl.SonicAclCLIError', also divided into three horizontal sections: the top section contains the class name, and the two bottom sections are shaded gray. A blue arrow with an open triangular head points from the top section of the 'sonic_cli_acl.SonicAclCLIError' box to the bottom section of the 'RuntimeError' box, indicating that 'sonic_cli_acl.SonicAclCLIError' inherits from 'RuntimeError'.

sonic_cli_acl.SonicAclCLIError
